Get Keys and Tokens	3

Objectives

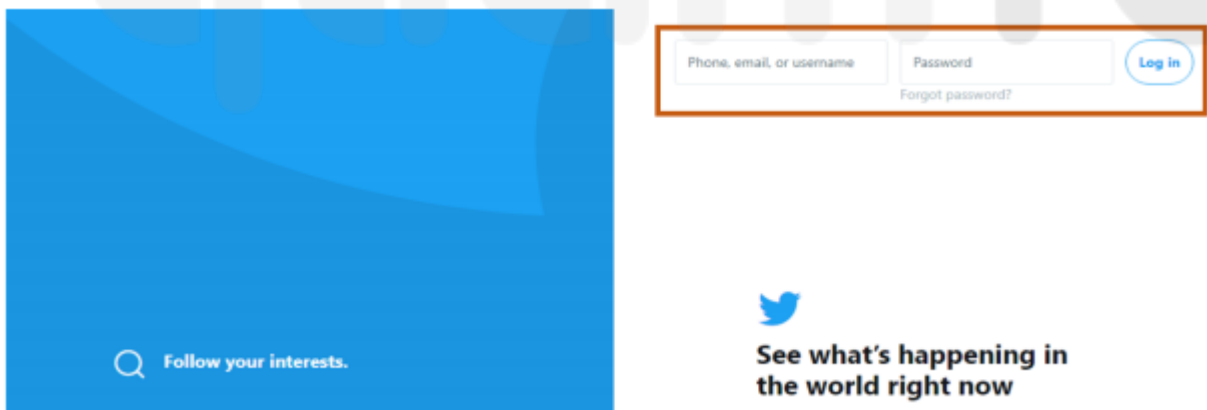

This is a detailed guide on how to get Twitter API keys. The steps are

1. Login to twitter account
2. Open twitter developer account
3. Create an app
4. Get keys and tokens

We will discuss each step in detail.

Login to Twitter

In the first step, you will login to your Twitter account.

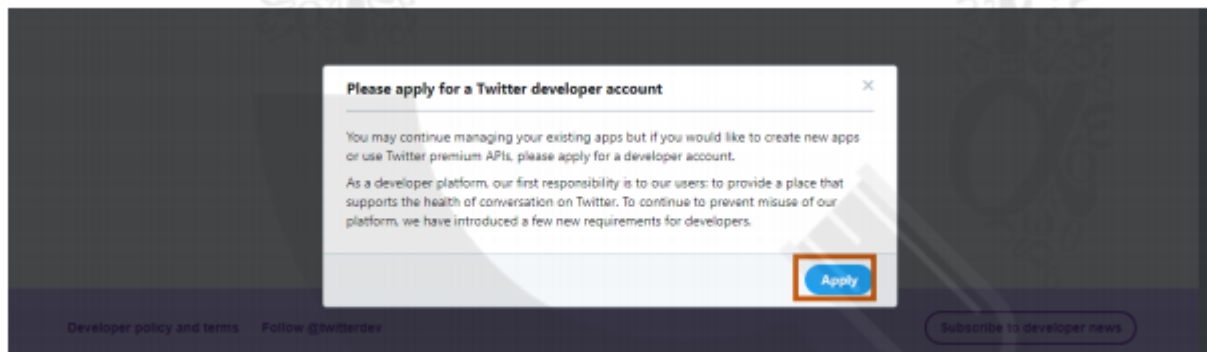

The image shows a screenshot of the Twitter login interface. On the left, there is a blue banner with a magnifying glass icon and the text "Follow your interests." On the right, there is a white login box with a blue border. Inside the box, there are two input fields: "Phone, email, or username" and "Password". To the right of the "Password" field is a blue "Log in" button. Below the "Password" field is a link that says "Forgot password?". At the bottom of the page, there is the Twitter bird logo and the text "See what's happening in the world right now".

Open Twitter Developer Account

In the second step, you will open the [Twitter developer](#) website. You can see a similar page as shown below.

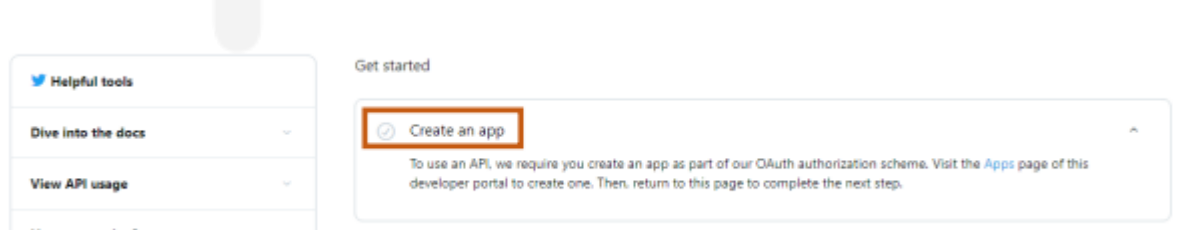

Click on the 'Apps' and you will be redirected to the following page.

Create an App

To create an app first you need to apply for the Twitter developer account and fill in all the details. The details are mostly about why you need Twitter data and how you are going to use it. After successfully creating your developer profile you will be directed to the following page.

Here you will find the option to 'Create an app'. Click on this and then you will be asked to fill another form to submit details such as App name and its usage.

Get Keys and Tokens

Submit the application and go to the 'Details' of the App. You can find your 'Keys and tokens' on the following page.
